## **Hillary Rodham Clinton New President ?**

*Senator Hillary Rodham Clinton delivers the Class Day address.*

Hillary Rodham Clinton is determined to become the next President of the United States. If she wins, she will be the first lady to be President in the whole history of her country.

She was born in Chicago in 1947 and she grew up in a middle-class family in the middle of the United States. She was a lawyer and member of 17 administration councils. She has written many books. She is the wife of ex-President William Jefferson Clinton (from 1993 to 2001). She has also been Senator Democrat of New-York since 2001.

She has constituted a team of 50 workmates called "Hillaryland" that is very disciplined .

She has got a budget of 14 million dollars, it's the most expensive campaign in the United States.

In a recent poll she gets 41% of vote intentions. Another survey indicates 59% of women would vote for her .

She has a lot of experience because her husband was President for 2 mandates and she is a senator so she has many calibers to be President despite her problem with her husband in the past. But there are still many days to come before the elections, so the other nominees have much time to change the prognostications !
